

## ENVIRONMENTAL MANAGEMENT POLICY

INTERNATIONAL PAPER MADRID MILL understands that the quality of our products is the key factor to achieve our customers' loyalty. Likewise, we understand that our **PRODUCTION OF 100% RECYCLED CARDBOARD PAPER** activities can have an impact on the environment (wastewater discharge, waste production, resource consumption...).

Concern and respect towards the environment is one of **INTERNATIONAL PAPER MADRID MILL's** core values, and it materializes in the compliance with regulations and the continual improvement of our Environmental Management.

To strengthen our commitment to the Environment, the Organization has decided to implement an Environmental Management System in accordance with international standard **UNE-EN-ISO 14001: 2015**.

To this end, IPMM commits to:

- Establishing methods to determine present and future needs of all stakeholders, as well as assessing their acceptance.
- Fulfilling the requirements agreed with our customers and stakeholders, as well as complying with applicable legislation and regulations.
- Complying with applicable environmental legislation and regulations, as well as with any other self-imposed requirements.
- Continually improving our environmental behaviour and pollution prevention, which takes precedence over production.
- Monitoring the Company's activities, analyzing significant environmental impact.
- Providing the necessary resources for all our activities to lessen their ecological footprint and their impact on the surrounding community.
- Fulfilling the requirements of the Chain of Custody, which guarantees that we only use recovered raw materials.
- Setting goals and objectives suited to the nature of the environmental impact of our activity.
- Maintaining effective management systems, essential to continual improvement.
- Sustainable use of resources
- Protecting biodiversity and ecosystems
- Mitigating climate change
- Taking into account the premises of this policy when planning new operations.

Every member of our Organization is responsible for protecting the environment in the activities that are carried out in our facilities.

STEVEN P. BRAUN

Madrid Mill Manager
