

Did You Know?

- Everest SBS, as sold from our manufacturing and converting facilities, is fully recyclable
- Treatment or converting by downstream users may restrict or eliminate Everest SBS recyclability
- Coatings, inks, and adhesives can affect the ability of some products to be recycled and may pose challenges to the recycling process
- We can not guarantee the recyclability of the finished product or package as we do not know how the board will be treated after sale
- If converting and use have not changed the board's status AND paperboard access to recycling is available, then the finished product or package made with Everest SBS should be generally recyclable
- Everest SBS is sourced from a renewable resource
- Everest SBS is sustainably managed and third-party certified
- Everest SBS is made with over 70% renewable energy

Everest® SBS Recyclability
