

7 ways to beat rising drum costs.

SpaceKraft offers a broad range of IBC and liner choices, because our customers have such diverse needs. For customers with unique problems, our engineers customize the design to meet specific production and barrier requirements.

SUPERIOR STRENGTH. Depending upon the number of plies used, our corrugated IBCs offer from 37,000 to 75,000 pounds of top-to-bottom compression strength and stacking from four to six high.

SIMPLE SETUP. SpaceKraft® IBCs can be set up in just one minute.

ENVIRONMENTALLY FRIENDLY. These IBCs are easily recyclable, completely biodegradable and waste-to-energy efficient.

SPACE SAVINGS. Filled SpaceKraft IBCs hold the same amount of product as drums in 20% less space. Empty, they can save as much as 80% in storage.

EASE OF USE. They can be used on almost all existing filling and dispensing lines.

WIDE RANGE OF SIZES. SpaceKraft containers are available in sizes ranging from 220 gallons to 330 gallons. Plus, a 1,000-liter size is available for export.

OPTIONAL EQUIPMENT. Many equipment manufacturers are available to help you optimize your SpaceKraft packaging line with options that include filling, mixing and dispensing aids. We can help you choose the one that's right for you, along with a supplier in your area.
