

# Mechanical Packaging Systems for Produce

## Agriculture Packaging

Container The Americas

### Full Service Provider

- Since 1967, we have provided the produce industry with leading mechanical packaging systems.
- International Paper's regionally located Mechanical Packaging Systems (MPS) Managers assist customers with machine selection, placement, setup and maintenance.
- Locations in California, Mexico, Florida, Arizona, Washington, North Carolina and Chile.
- Managers support customers by ensuring our machines run smoothly throughout use.

### Increased Productivity

- International Paper's high-speed mechanical packaging systems offer produce shippers and growers increased productivity.
- Our equipment is kept in excellent condition, reducing downtime.

### Versatile, Operator-Friendly Equipment

- Our machine fleet can form any styles of cartons: One Touch®, Defor®, Octalite®, DST, Plaform™, BTB Wave Tray, HSC, RSC, and Bliss, just to name a few.
- The International Paper designed Tray Former (WTF) can form the One Touch®, Octalite® and Defor® common foot-print, DST styles and other common produce packaging designs on the same machine.
- Our machines are ergonomically friendly and well-suited to operators.
- All equipment is designed with safe field operation in mind.
- Over 2000 pieces of equipment.

### Innovation

- Our mechanical packaging machines are built by International Paper and are quickly put into place where needed.
- We are constantly looking at new designs and technologies to offer our customers
- R&D ongoing to improve packaging setup
