

INTERNATIONAL  PAPER

One Touch[®]

One Touch is a modular box design engineered to meet the specifications of your product, your packaging requirements and your machine needs.

International Paper's superior design capabilities and unmatched machine support provide us with the ability to work with existing systems to minimize changeover costs while greatly enhancing package performance throughout the distribution chain.

Features modular and interstackable units

OneTouch boxes come in full-and half-sizes to properly meet the needs of different types of produce commodities. Boxes are designed with interstacking tabs and receptacles so that single commodity and mixed loads work together to maximize full-pallet load performance.

Provides cost savings throughout the distribution chain

International Paper's staff of professionals will work with you to minimize OneTouch conversion costs. OneTouch also eases labor and handling costs from transportation to the retail shelf.

Optimizes cube utilization

OneTouch boxes eliminate gaps and wasted space on pallet loads, increasing the ability to ship more cube-efficient truckloads.

Ensures product protection

OneTouch boxes are uniquely designed to cushion and protect products at each point in the distribution chain. Boxes can be custom designed to provide additional strength, ventilation, and/or moisture barriers to properly protect each produce item.

Offers display and non-display box designs

OneTouch boxes can be produced in both display and non-display versions to meet the needs of your product and your retail customer. Display boxes allow produce to be packed, shipped and merchandised in the same box.

Reduces shrink and delivers fresh produce

OneTouch boxes provide superior protection and load stability, reducing damage and loss. Less damage means higher quality produce that is as appealing on the store shelf as it was in the field.

Is compatible with the FBA Corrugated Common Footprint Standard

OneTouch boxes are compatible with the guidelines of the corrugated industry's Corrugated Common Footprint Standard. OneTouch boxes from International Paper will stack and palletize with boxes from different manufacturers in accordance with the FBA standard.

No matter where you sit in the produce distribution chain - whether you're a grower, shipper, retailer or consumer - International Paper meets your needs and high expectations with just **One Touch**.
