INTERNATIONAL PAPER

# Digital Papers

# DID YOU KNOW

**Digital printing is the fastest growing segment in the printing industry. We want to provide you with as much education and support as possible for selling to this market. To this end we have created a new Digital Printing Brochure that provides an overview of the entire International Paper digital product portfolio along with a comprehensive compatibility guide.**

## Digital Printing Brochure

International Paper has been at the forefront of the digital printing revolution since its very inception. This brochure is a single-source reference tool for our entire digital product offering. It lists all of the paper grades, weights, sizes, colors and finishes available. It also includes a pull-out digital equipment compatibility guide with paper recommendations to optimize printability and runnability on current digital equipment.

**What you'll find inside**

- The expertise and commitment International Paper brings to digital printing – qualities that show we stand behind every brand we sell.
- The digital-printing value propositions of each individual brand – great info for cross-selling, as well as a convenient, single-source reference.
- Comprehensive, up-to-date digital press compatibility information – an excellent resource for selling to a printer's specific press needs.

*Order your copy today by calling the International Paper Sample Center at 1-800-221-0809.*

## Compatibility Guide

The comprehensive Digital Printing Compatibility Guide is an excellent reference tool and can be ordered separately from the brochure.
For copies please call: 1-800-221-0809.

*Please visit IPpaper.com for the most up-to-date Compatibility Guide available.*
