

Innovative Products

As a leading supplier of packaging, pulp and paper, we create products people depend on every day.

Right Size Packaging is a manufacturing solution that allows our customers to create efficient-sized packaging to reduce their freight costs while still ensuring optimal product protection.

Accent® Opaque brings paper to life by using the IP4D app to incorporate augmented reality technology into print design, helping our customers create more impact.

Download the IP4D app from the App Store or Google Play, scan this page and watch it come to life.

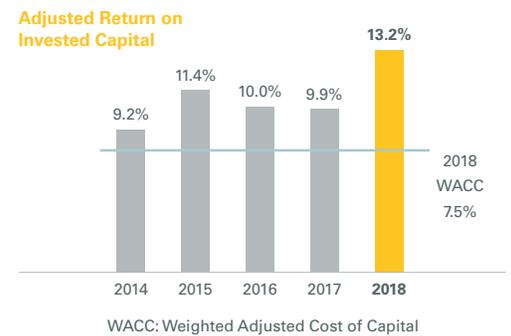

Elegance® Fluff Pulp enables our customers to produce environmentally responsible absorbent hygiene products. This sustainable and innovative technology addresses our customers' needs by allowing them to create thin, soft and discreet products without compromising performance.

The PipiKat® Box is an award-winning, environmentally friendly cat litter box sold in Spain. Featuring a water-resistant liner and absorbent clay, this compact litter box is easily unfolded into a hut and recycled after use.

Inspired Performance

2018 We **invested \$1.6 billion in our facilities** to improve safety and reliability, lower costs and strengthen our businesses.

We **exported nearly 28% of the products we manufactured in the U.S.** to markets in Latin America, Asia and Europe.

Investing in People

More than **\$21 million** invested in 2018 to address critical community needs

We make sustainable investments to protect and improve the lives of our employees and mobilize our people, products and resources to address critical needs in the communities where our employees live and work.

500,000 disaster relief boxes donated to Feeding America® and food banks across the U.S. to support disaster recovery

\$1.7 million provided by International Paper and our Employee Relief Fund to more than 1,200 employees affected by Hurricanes Florence and Michael and other natural disasters in 2018

277,000 people positively impacted by educational, environmental and sustainability programs offered by International Paper Institute in Brazil since 2007

Our Goal: Injury-Free Workplace

At International Paper we invest in continuous, deliberate improvement to ensure everyone – employees and non-employees – goes home safely every day. In 2018, we focused on:

- Expanding safety leadership principles and tools to empower and protect one another
- Improving our contractor safety management program
- Sustaining progress in our initiative to eliminate serious injuries

"While we have made tremendous progress in safety over the years, we experienced disheartening setbacks in 2018. Thirty-seven people and their families were impacted by serious injuries, including three individuals who lost their lives. To restore our path to injury-free, we are committed to intentional safety leadership by turning our values into action."

–Tommy S. Joseph
senior vice president, Manufacturing, Technology, Environment, Health and Safety and Global Sourcing

Sustaining Forests

Science-Based Targets for Forests

We joined forces with World Wildlife Fund to begin creating the first ever science-based targets that will identify what quantity and quality of forestland is needed for the planet, people, animals and plants to thrive.

Celebrating Five Years of Impact

Our Forestland Stewards partnership with the National Fish and Wildlife Foundation has resulted in:

- \$15 million invested to conserve southern U.S. forests, leveraging more than \$36 million in matching funds
- 400,000 acres of wildlife habitat that will be restored and protected

Advancing Russian Forestry

We work with regulators, academia, non-governmental organizations and industry leaders to bring sustainable forest management practices to Russia's forests.

Advancing Certification

International Paper's wood sourcing business in France has helped more than 700 forest owners implement sustainable forestry management practices.

Forests as a Climate Solution

We're collaborating with The Nature Conservancy on Natural Climate Solutions, techniques that increase carbon storage and avoid greenhouse gas emissions in forests.

Innovating for Forests

We developed an app that uses mapping technology to help our U.S. fiber sourcing team ensure the fiber we procure doesn't compromise forest habitats.

Celebrating 20 Years of Forest Preservation

Our collaboration with São Paulo Botanical Institute has generated techniques for restoring forests in Brazil.

- More than 100 native tree species have been preserved

Improving Our Planet

Exceeded

2020 GOAL PROGRESS:

21%

reduction in GHG emissions from 2010

Our Vision 2020 Goal is to reduce greenhouse gas (GHG) emissions by 20% from 2010. As we continue to reduce GHG emissions through 2020, we are also developing the next generation of sustainability goals for forest stewardship, air emissions, energy and water stewardship.

To learn more about our Vision 2020 Goals, please visit: InternationalPaper.com/vision-2020

Helping Customers Meet Their Packaging Goals

25 U.S. box plants achieved FSC®, SFI® and PEFC™ chain of custody certification in 2018.

Aligned with UN's Sustainable Development Goals

We mapped our global citizenship strategy to nine of the United Nations' Sustainable Development Goals, highlighted in color below. These goals have particular relevance given the nature, scale and reach of our company.
