

Fanfold

Simplify Your Packaging Operations

Try our Fanfold today!

Fanfold, also known as Z-Fold or UniFold, is a continuous corrugated board, accordion folded into a bale. Bales are either pre-scored to your specifications, or not scored to be used with automated box converting machines.

Features

ECT and mullen grades available.

All liners including BriteTop® white.

100% recyclable coatings. Water, grease abrasion and oil resistant.

B-Flute, C-Flute and BC Doublewall.

Fold length at 1200mm.

Various score options available.

Full printing, random printing and Pre-Print up to 6 colors.

Finishing/Shipping - Pallets and stretch wrap.

Benefits

Customization - Provides an ideal solution for unusual shaped products with varying lengths and widths.

Saves money and space - Reduces multiple SKUs, slow moving SKUs, waste and total inventory. Reduces warehouse space and labor costs. Eliminates extra charges for box order minimums or smaller set-up fees.

Easier handling - Improves handling, shipping and storing with consistently sized units.

Convenience and flexibility - Creating your packaging when you need it, in the size you need - one SKU for all of your packaging.
