

IP Order Management Portal

Always open for business

GoBox[®]

Pick, Click and **Go**.

What is it?

International Paper's North American box business puts your order information at your fingertips - access anytime, anywhere. IP GoBox provides the ability to check your order status, enter orders, check inventory levels, and configure orders and releases based on truck load capacity. With IP GoBox, we are **always open for business!**

Do you ever need to ask . . .

Orders:

- What is the status of my order?
- Can I get an automatic open orders report?
- Can I get a copy of a BOL or invoice?
- How much did I buy from IP last year?

Inventory:

- What items is IP storing for me?
- How much inventory does IP have on hand for us?
- What will my inventory position be next week?
- Can I get an automatic inventory report?

Catalog:

- Can I see all my items and pricing on-line?
- How can I place an order any time of day?
- Can I view pallet, standard unit count and other specification information on-line?

Truck Utilization:

- How do I ensure that I build an order or release based on what will fill a truck?
- Can I designate a "fill item" based on trailer capacity?
- Can I save a loading solution for future use?

. . . then IP GoBox is for you!
